Service Suspension Request Form

Utility services may be suspended for no longer than six months per calendar year. Water, sewer, and solid waste for residential customers are considered bundled services and must be suspended together. MB Link may be suspended separately if the customer wishes to leave the other services active. If the customer requests temporary activation of utility service during the suspension period, the suspension is voided and the account will return to active status. Suspensions may only be requested by the utility account holder.
